## A Complete Plastics Solution to Improve Your Profitability

OMP combines the resources and skills of a team of over 200 employees operating out of two facilities to provide complete solutions to satisfy your most demanding thermoplastic custom molding requirements. We offer a complete service package from part concept review and recommendation to painting and assembly. Our facilities are strategically located in New York and North Carolina.

Our thermoplastics molding facilities have extensive experience with engineered resins and processing solutions to support our customers and resolve their product issues. Additionally our mold and tool building facility brings an added dimension to our full service capabilities.

Molding capabilities include 60 thermoplastics injection molding presses ranging in tonnage from 22-960 tons.

OMP continually maintains strict quality standards to provide our customers with the highest level of product quality.

## From Design to Finished Product

OMP has the technical capability and resources to compress the time-frame for Rapid-Product Development in an Early-Supplier-Involvement atmosphere. We offer experienced project management to assure that our customers' concepts become quality finished goods, shipped on time. As a single-source supplier, we provide all the services needed to assure that a part — or an entire project — comes on-line, on-time, and with no surprises.

## From Decoration to Assembly

Oneida Molded Plastics can be your one source for Custom Products or Outdoor Recreational Products.
